Summary

Certified WSO2 Middleware Developer with 2+ years with expertise in designing, developing, and maintaining REST APIs and integration solutions. Skilled in utilizing WSO2 technologies, including API Manager and Micro Integrator, for middleware implementation and enterprise system integrations. Hands-on -experience across the software development lifecycle, including technical design, API development, deployment, troubleshooting, and performance optimization. Strong understanding of integration patterns, API management, and backend services, with practical experience in delivering scalable and reliable solutions.

Education

Anna University - KIT Kalaignar Karunanidhi Institute of Technology May 2024

Bachelor of Engineering - ECE (CGPA: 8.69 / 10) *Coimbatore,Tamilnadu*

- **Relevant Coursework:** Python, Data structure, DBMS, C, Java, HTML, CSS, Javascript, SQL, Digital Electronics.

Experience

Impiger Technologies Aug 2024 – Present

WSO2 Developer *Coimbatore, Tamilnadu*

- Developed and maintained REST APIs and integration services using WSO2 API Manager (APIM) and Micro Integrator (MI) to support business applications and system connectivity.
- Designed and implemented mediation flows for request/response transformation, service orchestration, routing, and data processing across multiple systems.
- Worked on API publishing, lifecycle management, and policy configurations within WSO2 APIM to enable secure and scalable API consumption.
- Implemented authentication and security mechanisms such as OAuth2, JWT validation, and access control policies for secure API communication.
- Participated in integration development activities including requirement analysis, implementation, deployment, testing, and production support.
- Integrated backend services and databases using XML/JSON payloads and WSO2 Data Services to enable seamless data exchange between systems.
- Performed troubleshooting, debugging, and issue resolution to improve service reliability and optimize integration performance.
- Managed deployment, configuration, and maintenance of WSO2 integration artifacts across development, testing, and production environments.

Impiger Technologies

Joget-LCNC Developer

- Developed and customized low-code web applications using Joget to automate business workflows, form-based processes, and user task management.
- Configured forms, UI pages, process flows, and integrations in Joget to support business requirements and improve application usability and workflow efficiency.

Virtual Maze [Internship] Sep 2023 – Feb 2024

Software Engineer Intern *Remote*

- Built responsive web interfaces using HTML, CSS, JavaScript, and React.js to enhance user experience.
- Worked on live projects and collabrated with senior programmers

Projects

NITA UgHub - Govt Sector

WSO2 APIM, WSO2 MI, Java, REST APIs, XML, JSON, WSO2 Data Services Uganda-Offsite

- Worked on government integration platforms using WSO2 technologies to enable secure connectivity and seamless data exchange between multiple government systems and citizen-facing services.
- Developed and maintained REST APIs and integration services for various e-Government platforms and digital services using WSO2 API Manager and Micro Integrator.
- Designed and implemented mediation flows for request/response transformation, routing, validation, and service orchestration across different systems.
- Worked on exposing backend services securely through WSO2 API Manager and implemented integrations using WSO2 Micro Integrator.
- Integrated internal and third-party government applications to streamline communication and support secure data sharing across platforms.
- Implemented API security features such as OAuth2, JWT validation, throttling policies, and access control mechanisms for secure API consumption.
- Performed API testing, troubleshooting, and log analysis using Postman and WSO2 tools, while providing L2 production support to resolve incidents and improve service reliability.
- Participated in requirement analysis, deployment, environment configuration, and release validation across DEV, UAT, and PROD environments, working closely with QA, DevOps, and support teams.

UAB United Arab Bank - Banking

WSO2 APIM, WSO2 MI, Java, REST APIs, XML, JSON, WSO2 Data Services UAE-Offsite

- Contributed to the migration of legacy middleware services to a WSO2-based API architecture for a leading banking client in the United Arab Emirates.
- Developed and enhanced REST APIs and integration services to improve performance, scalability, and maintainability across banking applications.
- Participated in API development activities including implementation, SIT support, UAT support, deployment, and production issue resolution.
- Collaborated with developers, QA, DevOps, and infrastructure teams to ensure successful integration delivery and stable production releases.
- Performed API troubleshooting, debugging, and optimization activities while following API governance, security practices, and version management standards.
- Supported deployment and release activities to maintain stable and reliable production environments.

MBZUAI - Education Sector

WSO2 APIM, WSO2 MI, Java, REST APIs, XML, JSON, WSO2 Data Services UAE-Offsite

- Provided support for REST APIs and integration services developed using WSO2 API Manager and Micro Integrator.
- Assisted in API testing, troubleshooting, debugging, and issue resolution to ensure stable and reliable integration services.
- Supported API mediation, routing, and transformation activities for communication across multiple systems.
- Participated in deployment, configuration, and monitoring activities across development, UAT, and production environments.
- Worked with development, QA, and infrastructure teams to support releases and maintain system stability.

Chola CDRF & Investigation Portal

Joget DX 7, Low-Code/No-Code, SQL, jQuery, JavaScript, BeanShell

- Supported the design and development of forms, workflows, business processes, and web services using Joget DX.
- Assisted in implementing backend logic and data handling using BeanShell scripting, SQL binders, and Joget plugins.
- Collaborated with business users to understand requirements and improve usability, workflow efficiency, and user experience in low-code applications.

Technical Skills

WSO2 Technologies: WSO2 API Manager (APIM), WSO2 Micro Integrator (MI), WSO2 Identity Server, WSO2 Data Services
Integration & API: REST APIs, API Development, API Publishing, API Lifecycle Management, Mediation Flows, Service Orchestration, XML, JSON, SOAP
Security & Authentication: OAuth2, JWT, Access Control, API Security Policies
Languages: Java, Python, SQL, JavaScript
Low-Code / Web: Joget DX, Low-Code/No-Code Application Development, Forms, Workflows, BeanShell, jQuery
Tools & Support: WSO2 Integration Studio, Postman, Hoppscotch, Git, Jenkins, Log Analysis, Production Support.

Certifications

- WSO2 API Manager (APIM) Developer v4
- WSO2 API Manager (APIM) Practitioner v4
- WSO2 Micro Integrator (MI) Developer v4
- WSO2 Micro Integrator (MI) Practitioner v4
- WSO2 Identity Server (IS) Developer v7
- WSO2 Identity Server (IS) Practitioner v7
- Infosys Springboard - Python Foundation Certification
- Infosys Springboard - Python Beginner Certification
- Infosys Springboard - HTML5 Certification
